

# Customisable eFX Liquidity Solution

Adaptable for multiple trading platforms

## AXIS Markets offers customised eFX solutions to various global institutions, such as banks, hedge funds, proprietary trading firms, and retail brokers.

Our relationships with top-tier banks, regional specialists, and select non-banks allow us to provide exceptional liquidity and true risk pricing. Our market position and scale enable us to offer individually tailored competitive pricing, effectively reducing your trading costs.

Our product range includes FX and precious metals spot, forwards, NDFs, swaps, and spot energy contracts. As your trusted partner, we operate under a riskless principal trading model to ensure full alignment with your interests. We meticulously select market-maker relationships, exclusively working with top-tier banks and regional specialists, and select

non-banks that offer genuine risk pricing. We offer personalised liquidity provision by creating and managing custom liquidity pools for each client, complementing existing sources with price discovery and transparency. Our size, multi-asset capability, and standing in the financial markets provide us with access to best-in-class liquidity and competitive pricing, effectively minimising trading costs. Through our carefully curated liquidity, we execute trades with minimal market impact. Using an independent analytics provider, FairXchange, we collaborate with all clients to optimise their fill rate, resulting in an average of over 95% fill rate optimisation.

Alternative  
Credit Solutions

We provide market-leading technology options, with connectivity to over 20 FX platforms (GUI & APIs), including semi-disclosed pricing through ECN central limit order books.

Our agile technology supports flexible and mobile execution methods. We offer execution alternatives, supporting both the full amount and sweepable streams. We provide flexibility of access through direct bilateral credit, margin, or prime broker credit options. Our global reach, with LD4, NY4, and TY3 data centres, ensures ultra-low latency access to your custom liquidity pool.

We offer outstanding service, with round-the-clock support from our specialists. We also offer alternative credit solutions, including third-party credit intermediation, direct ECN access, and FX clearing. Our eFX team has enhanced the firm's

established infrastructure and long-term counterparty relationships over the past decade to develop award-winning e-FX liquidity solutions. The team focuses on providing tailored access and technology solutions for aggregated FX spots, forwards, swaps, and bullion liquidity.

Additionally, they offer access to ECNs, third-party credit intermediation, and FX clearing. Our experts frequently share their insights at industry conferences and trade publications and actively participate in training and events with the ACI, the leading FX Financial Markets Association.
